PROFESSIONAL PROFILE

Multimedia Engineering student with hands-on experience in XR development (AR/VR), game development in Unity, UX/UI design, audiovisual production, and fullstack web development. I have led and contributed to projects ranging from augmented reality applications and 3D video games to web platforms with authentication and database management. I apply methodologies such as Design Thinking and User-Centered Design (UCD) to build user-focused products. Co-founder of Nebuly Studios, where I combine creativity and technology to deliver immersive and functional experiences.

KEY SKILLS

Unity · C# · AR (ARCore / XR Toolkit) · VR (Meta Quest) · Game Development · UX/UI · Figma · Design Thinking · UCD · Blender · Substance 3D Painter · Adobe Suite (Premiere Pro, After Effects, Photoshop, Illustrator) · Motion Graphics · Node.js · HTML · CSS · JavaScript · Bootstrap · MySQL · MongoDB · Python · GitHub · Scrum · Notion

EXPERIENCE

Multimedia Engineer & Co-founder | *Nebuly Studios* Sep 2025 – Present

- Development of 2D/3D video games, AR/VR applications, and interactive web platforms within a team of 4 professionals.
- Creative and technical leadership on projects such as Mollasault (narrative game + web platform with AI integration).
- Applied UCD and Design Thinking to ensure usability and alignment with client goals on every project.
- Audiovisual production, motion graphics, 3D modeling, and graphic design as part of project deliverables.
- Project management using Scrum methodology with GitHub and Notion.

Freelancer – Multimedia Production & Editing | *Self-employed* Jun 2024 – Present

- Produced audiovisual content for social media including reels, short-form videos, and motion graphics using Adobe Premiere Pro and After Effects.
- Managed client relationships and adapted content to brand needs and digital trends.

Intern – Multimedia Engineering | *Universidad Autónoma de Occidente* Sep – Nov 2024

- Designed and facilitated interactive activities for prospective student orientation events, applying UX principles.
- Produced multimedia materials and coordinated logistics for experiential events.

FEATURED PROJECTS

Caficultor VR | *Unity · C# · XR Toolkit · Meta Quest* 2025

- Immersive VR educational experience for Meta Quest that teaches the Colombian coffee production process through interactive environments.
- Designed and implemented VR interaction mechanics, 3D environments, and guided narrative flow.

Mollasault & Web Platform | *Unity · Web Development · AI · Nebuly Studios* 2025

- Narrative video game developed at Nebuly Studios alongside a web-based logbook platform that extends the game experience.
- Integrated AI tools into the development pipeline to speed up asset and content production.

AR App – Memorias Exhibition | *Unity · ARCore* Oct 2025

- Developed an Augmented Reality application in Unity for an academic exhibition at Universidad Autónoma de Occidente.
- Improved audience engagement with digital content through an immersive experience; applied UX principles for non-technical users.

3D Video Game – Resident Evil Fan Project | *Unity · C# · Enemy AI* 2024

- 3D survival horror game featuring enemy AI (NavMesh), environmental puzzles, and classic genre mechanics.
- Designed levels, programmed AI behaviors, and built an inventory system in Unity.

Banco de Occidente Clone – Web App | *Node.js · MySQL · JavaScript · bcrypt* 2024

- Fullstack web application with user authentication, secure registration, and session management.
- Backend built with Node.js and MySQL; password encryption with bcrypt and protected route handling.

UX/UI Project – Vocational Guidance Platform | *Figma · UCD · Design Thinking* Aug – Nov 2025

- Led user research through surveys, interviews, and observation to identify vocational guidance needs.
- Developed a functional MVP using journey maps, benchmarking, and validation via SUS scale and findability tests.

Realistic 3D Model – Gaming PC | *Blender · Substance 3D Painter · Cycles* 2024

- Full PBR modeling, texturing, and photorealistic rendering of a gaming PC setup.

Fanta Blast – Branding & Commercial Spot | *Adobe Suite · After Effects* 2024

- Complete visual identity for a conceptual brand: logo, graphic assets, and animated commercial spot.

EDUCATION

B.S. in Multimedia Engineering 2023 – Present

Universidad Autónoma de Occidente · Cali, Colombia

Technical High School Diploma – Industrial Electricity 2022

Centro Educativo Industrial Luis Madina

CERTIFICATIONS & CONTINUOUS LEARNING

- Python Fundamentals – Platzi (2023)
- Self-directed learning in Unity, XR development, UX/UI, Figma, and web development – Platzi, Coursera, YouTube

TECHNICAL SKILLS

XR & Game Development: Unity, C#, ARCore, XR Toolkit, Meta Quest, VR, AR, Game Design

3D Modeling & Graphics: Blender, Substance 3D Painter, Cycles, Motion Graphics (After Effects)

UX/UI & Prototyping: Figma, Wireframing, Journey Maps, Usability Testing, SUS Scale, Benchmarking

Multimedia Production: Adobe Premiere Pro, After Effects, Photoshop, Illustrator, Visual Branding

Web Development: HTML, CSS, JavaScript, Bootstrap, Node.js, Responsive Design

Databases: MySQL, MongoDB, CRUD, Authentication, Data Modeling

Programming: C#, Python, JavaScript, Java

Project Management: GitHub, Scrum, Design Thinking, UCD, Notion

LANGUAGES

Spanish: Native

English: Intermediate – B2
